# Vediol™

## Not All CBD Is the Same!

The proprietary and patented/patent-pending technologies behind Vediol blend yield the following benefits for the veterinary community over other CBD isolates, alternatives, and blends currently available. Vediol is protected by one or more of the following patents and patent pending: 13/973,509; 15/144,039; 15/853,748; 15/986,515; 62/329,042; 15/582,007.

### PBBD=E

**Purity** - Utilizing a proprietary subcritical “cold-pressed” technology to deliver a stable and high level of active CBD in every dose, ensuring there is no heat damage to active phytonutrients in the oils. As an FYI – heating oils above 115°F is damaging to phytonutrient quality and effectiveness.

**Blend** - Our proprietary blend insures the Entourage effect and enhanced synergistic product effectiveness.

**Bioavailability** - We utilize patent-pending Taurinol™ to enhance bioavailability of fat-soluble compounds, and Piperine ester to increase bioavailability of non-fat soluble compounds..

**Delivery** - We use a hydrosome technology that creates a condition of polymorphism to enhance absorption through formation of micro-particles called (“micelles”) for holding small volumes of chemical reactants for improved assimilation of active ingredients, plus two absorption enhancing technologies to enhance mucosal penetration, for accelerated onset of beneficial effect.

### Enhanced Product Effectiveness

**Vediol is only available through licensed veterinarians**

**Engineered for maximum absorption in pets\***  
\* Without enhancement CBD has low natural oral bioavailability (only 4% - 12%)

Alpha Tech Pet

## Veterinary CBD from Hemp for Pets

# Vediol™ FORMULATION

## All Natural Flavored CBD from Hemp

Vediol™ is a 100% hemp extract, plant-based nutraceutical for support of a pet's endocannabinoid system. Cannabidiol (CBD) Science is the answer. The Vediol blend delivers a highly purified cannabinoid consortium, devoid of THC, designed for maximum effectiveness. Vediol all-natural flavored CBD from lawfully cultivated Hemp is based upon multiple patented technologies, providing a proprietary liquid formulation based on the science of CBD to help support a pet's natural systems for a healthy and happy life. While no causal link has been established, abundant research would suggest non-human patients may benefit from receiving hemp derived CBD in support of their endocannabinoid system. **Vediol makes no medical claims from use of its products.**

### Vediol Proprietary Blend Ingredients:

Hemp oil containing Natural Entourage Sesquiterpene complex of *Beta-Caryophyllene*, *Caryophyllene oxide*, *Alpha-Humulene*, *Cannabidiol (CBD)\**, *Ocimene-1*, *P-cymene*, *Olea europaea (oil)*, *Taurinol™* (Taurine ester). In naturally occurring sesquiterpenes from lawfully cultivated industrial hemp, lecithin, all-natural flavor.

\* Contains 150 mgs/oz naturally occurring cannabidiol

**Vediol is only available to licensed veterinarians**

**Vediol, 12/box**  
SKU: 5900

**SUGGESTED USE**  
Dogs: 3 drops per 10lb body weight, 2 times daily (adjust to effect). Cats: 2 drops, twice daily. Can be mixed with food.

- Help support your pet's natural systems for a healthy and happy life
- Formulated for maximum absorption
- Multiple active components
- Supports the Endocannabinoid System

**Keep Out of Reach of Children**

Vediol is protected by one or more of the following patents and patent pending: 13/973,509; 15/144,039; 15/853,748; 15/986,515; 62/329,042; 15/582,007

### REALITIES ABOUT HEMP / MEDICINAL BENEFITS:

1. Many hemp products currently found on the market do not contain levels of CBD as advertised, are tainted with various impurities, and provide little to no therapeutic value. The hemp industry lacks broad oversight, and subsequently, many "fake" products make it to market.
2. THC is the psychoactive component of cannabis, and contrary to popular belief, the medicinal benefits of the cannabis plant can be unlocked without THC, and without inducing a "high."
3. Products containing THC in excess of 0.3% are controlled substances under the Controlled Substance Act (CSA) and are illegal at the federal level, and except for certain states that have legalized recreational marijuana, remain illegal at the state level in most US states.
4. Hemp by necessity must contain less than 0.3% THC. However, many hemp products are also devoid of other cannabinoids required for creating a proper "entourage effect" (biological benefits associated with full-spectrum extracts in proper proportions).
5. We use plant hybrids that result in zero THC, and above-average levels of CBD, compared to plant strains used in other products.
6. CBD has low bioavailability in dogs (only 4% - 12%) when injected orally. We have implemented proprietary technologies to substantially enhance the oral bioavailability of Vediol.
7. Potential drug interactions do exist in dogs and cats (as in people) due to the potential that CBD can alter or interfere with drug metabolism. This does not put your pet in danger. We invite you to consult with your veterinarian before administering Vediol in concert with any other drugs they might prescribe.
